

MANAGEMENT TEAM

MARC FUTTERMAN

President & Chief Executive Officer, Chairman of the Board

Marc Futterman has over 20 years of experience in combining the power of information technology, planning, and decision-making methods to execute successful client initiatives. Marc's extensive experience in applying geographic information systems (GIS) to the mix of problem solving tools forms the foundation of Civic Technologies. Client sectors include businesses from a wide variety of industries; public libraries; healthcare; and livable communities and mobility.

Prior to Civic Technologies, Marc was principal of his own urban planning firm specializing in consensus building process, urban and regional planning, growth management, real estate development and facilities management, and transportation and pedestrian planning. Recognizing that community planning disciplines had yet to combine the power of dynamic database technology with today's web-based tools and computing power, Marc co-founded Civic Technologies in order to integrate all of the resources available to create powerful, information laden applications delivered to the desktop of decision-makers.

Marc has held executive level positions at architecture and urban planning firms including UCLA's prestigious Urban Innovations Group. Marc has a range and depth of executive and management experience in delivering complex, multi-disciplinary projects for public sector, private sector, and institutional clients worldwide. His creative approach combines a commitment to GIS applications with multi-disciplinary management skills and extensive knowledge of the challenges facing the private sector, the public sector, and institutions.

As a regular contributor to public interest organizations, Marc has been featured as a guest speaker at universities and conferences across the globe. He has been recognized with several prestigious awards for his work in GIS and urban design. Marc holds a Master of Philosophy in Urban Design and Regional Planning from the University of Edinburgh, Scotland; and a Bachelor of Science degree in Architecture from the University of Southern California.

MAYEE SALGADO

Vice President, Operations & Chief Technology Officer

Mayee Salgado is co-founder of Civic Technologies and leads the operational side of the company setting project direction and overseeing project management. As CTO, Mayee manages content development and the integration of technology applications, platforms and information systems.

Mayee has over 15 years of experience in delivering customer-focused solutions utilizing expertise in GIS, urban planning, and graphic and cartographic design. Prior to co-founding Civic Technologies, Mayee held design and management positions at Futterman & Associates, Inc., UCLA's prestigious Urban Innovations Group, and R.R. Payumo and Partners in the Philippines. Combining strong design sensibilities with penetrating analytical capabilities, Mayee has an essential role in developing the content and user-friendly interfaces that are the hallmark of Civic Technologies' products and services.

Mayee holds a Master of Architecture in Urban Design from the University of California at Los Angeles and a Bachelor of Science degree from the University of the Philippines. In addition, she holds Environmental Systems Research Institute, Inc. (ESRI) certification in various GIS disciplines.
